GRUPO ADV®

United by Excellence

ADVERSIA® | DCB® DACOBEL | EUROSAVOY®

Our **Lines**

Chic Line

Exclusive design line with limited stock to analyze market trends.
Crucible of ideas and inspiration for new garments and corporate projects.

TOP Sales

Our best-selling products and with the most competitive price.

adversia Premium

Items made with the most exclusive fabrics, components, and trimmings in the sector.

The Fabrics of the Future Are Already Here

NanoTec Technology

With this revolutionary technology, we have developed a molecular-level chemical composition applied to the fabric that gives it water-repellent properties. This allows garments to achieve greater durability without losing their performance.

NanuTec

"The Chameleon of Fabrics"

For years, we have used our own yarn to create a second-skin feel with our thermal products, making us number one in the sector. We are pioneers in laboratory testing these garments, achieving outstanding results.

There are many thermal garments, but only one NANUTEC.

An **intelligent fabric** that stands out for its high adaptability to external temperature: when it's cold, it closes to block it out and retain heat.

SOLITEC INDUSTRY

polycotton económico

- Color Durability
- Mercerized
- Sanforized
- Pilling-Resistant
- Elastic

SuitFlex

"The Best Fabric for Your day to day "

Elastic, fresh, comfortable, lightweight, soft to the touch, and elegant.

LYCRA®

ONLY BY DUPONT

- -Stretches four to seven times its original size and then returns to its initial shape
- -As soon as the stretch is released, it instantly returns to its original length
- -Maintains its elasticity over time
- -Completely invisible and does not alter the outer appearance of the fabric
- -Garments with LYCRA® fiber require no special care: easy care

BIONIC FINISH®

- -Applied water-repellent component
- -Dirt-repellent
- -Keeps colors and fabric looking new over time
- -Allows fabrics to dry faster
- -Makes fabric care easy
- -Water-resistant
- -Weather-resistant

Industry Trousers

The Fabrics of the Future Are Already Here

NanoTec Technology

With this revolutionary technology, we have developed a molecular-level chemical composition applied to the fabric that gives it water-repellent properties. This allows garments to achieve greater durability without losing their performance.

NanuTec

"The Chameleon of Fabrics"

For years, we have used our own yarn to create a second-skin feel with our thermal products, making us number one in the sector. We are pioneers in laboratory testing these garments, achieving outstanding results.

There are many thermal garments, but only one NANUTEC.

An **intelligent fabric** that stands out for its high adaptability to external temperature: when it's cold, it closes to block it out and retain heat.

SOLITEC INDUSTRY polycotton económico

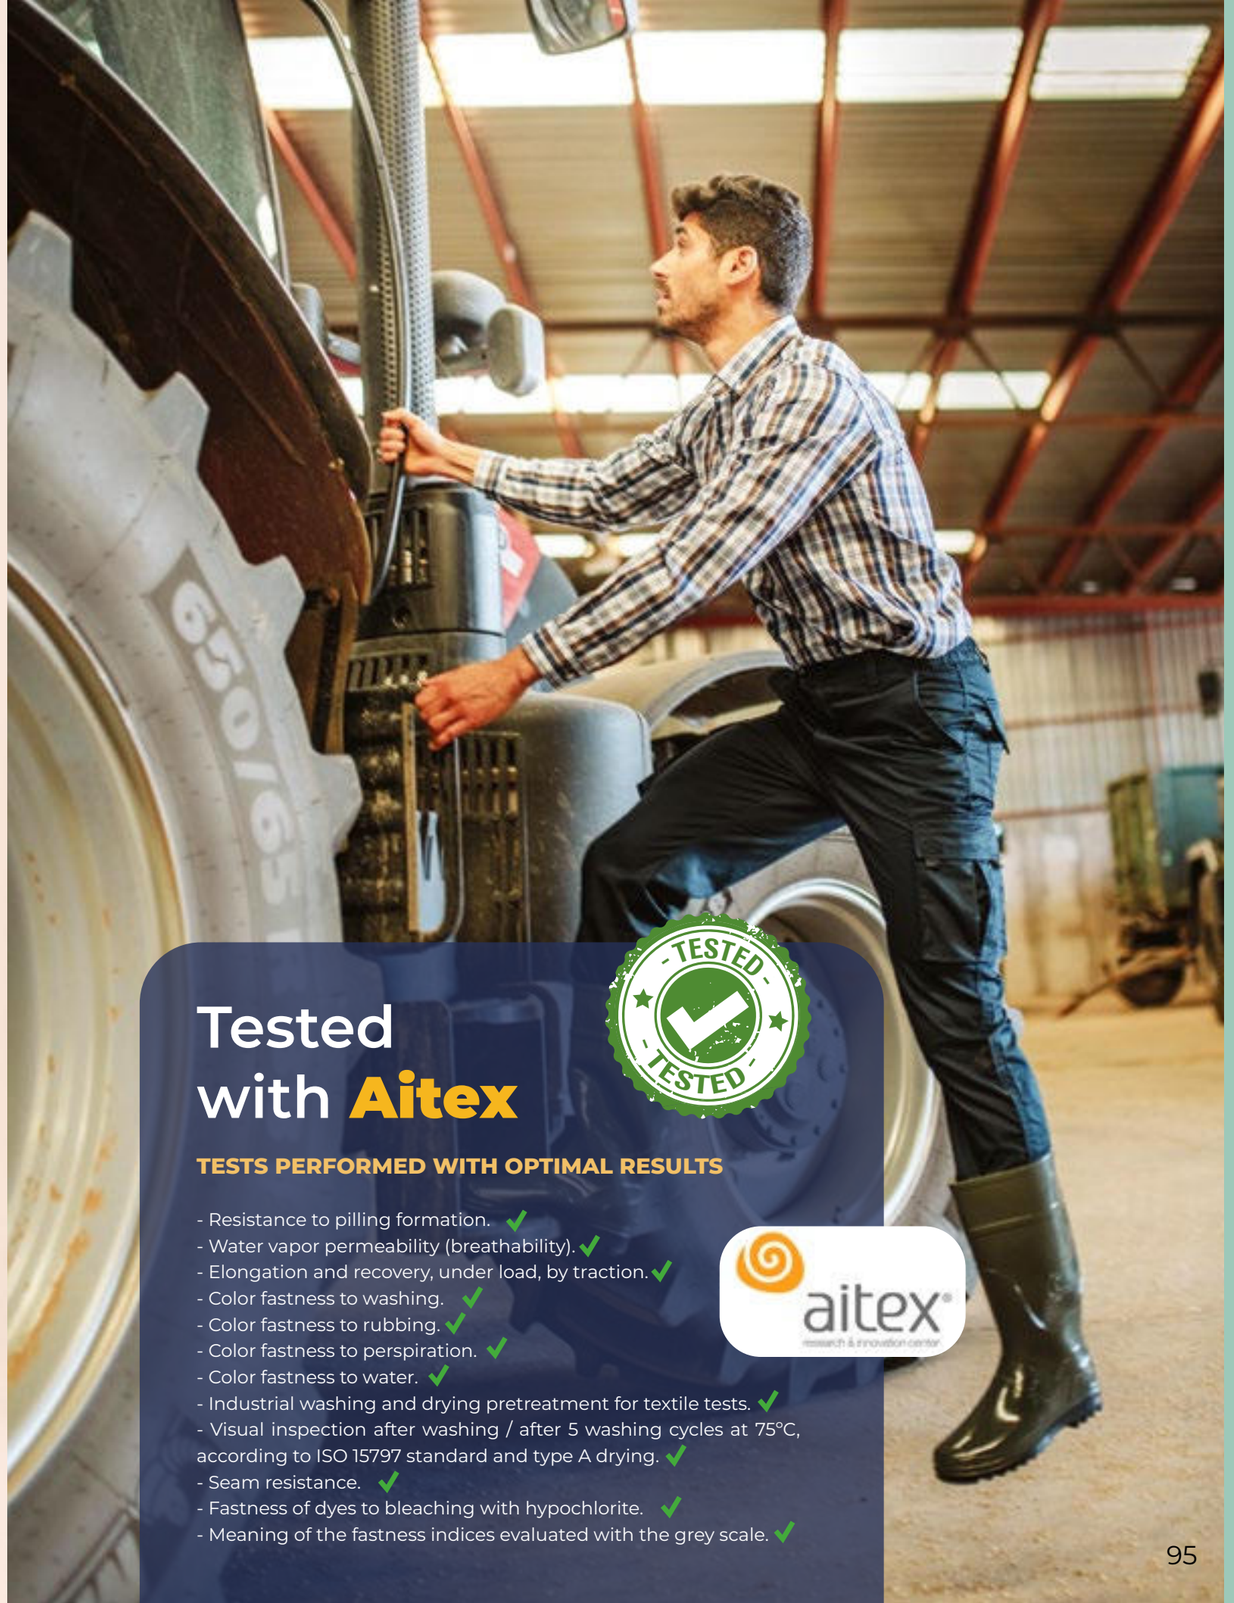
*Tests conducted by AITEX

NanoTec



Tested with Aitex

TESTS PERFORMED WITH OPTIMAL RESULTS

- Resistance to pilling formation. ✓
- Water vapor permeability (breathability). ✓
- Elongation and recovery, under load, by traction. ✓
- Color fastness to washing. ✓
- Color fastness to rubbing. ✓
- Color fastness to perspiration. ✓
- Color fastness to water. ✓
- Industrial washing and drying pretreatment for textile tests. ✓
- Visual inspection after washing / after 5 washing cycles at 75°C, according to ISO 15797 standard and type A drying. ✓
- Seam resistance. ✓
- Fastness of dyes to bleaching with hypochlorite. ✓
- Meaning of the fastness indices evaluated with the grey scale. ✓

Comfort in Every Fiber

EASY WASH AND DRY
The technology applied to the yarn ensures it does not get damaged during washing, and prevents water from penetrating the fabric, resulting in minimal drying time.

WATER-REPELLENT
The chemical composition applied through nanotechnology gives our fabric water-repellent properties.

HIGH COLOR DURABILITY
Nanotec technology, combined with high-performance dyes, ensures that colors remain vibrant over time.

GRATIO
Microfibra
100% Poliéster

LIGHTWEIGHT
Our yarn, being hollow, makes the garment extremely lightweight compared to other microfibers.

BREATHABLE
Tested in the laboratory, with excellent results in water vapor resistance, our microfiber stands out as unique within the sector.

NanoTec
Technology

With this revolutionary technology, we have developed a molecular-level chemical composition that is applied to the fabric, giving it water-repellent properties. This allows garments to achieve greater durability without losing their performance.

*Breathe with **Hidroflex**.*
The stretch microfiber that breathes.

STRETCHABLE
Our innovative elastic yarn allows us to eliminate the need for elastomers—less durable materials that lose their properties when exposed to high temperatures and harsh chemicals.

EASY WASH AND DRY
The technology applied to the yarn ensures it does not get damaged during washing, and prevents water from penetrating the fabric, resulting in minimal drying time.

WATER-REPELLENT
The chemical composition applied through nanotechnology gives our fabric water-repellent properties.

HIGH COLOR DURABILITY
Nanotec technology, combined with high-performance dyes, ensures that colors remain vibrant over time.

HidroFlex
Microfiber

LIGHTWEIGHT
Our yarn, being hollow, makes the garment extremely lightweight compared to other microfibers.

BREATHABLE
Laboratory-tested, with excellent results in water vapor resistance, our microfiber stands out as unique within the sector.

NanoTec

NanuTec
"The Chameleon of Fabrics"

Fabric with Technology *NanuTec* and Certified *Confort Plus 3*

For years we have used our own yarn to achieve a second skin with our thermal products, making us the number one in the sector. We are pioneers in testing these garments in the laboratory with sensational results.

There are many thermal socks, but only one NANUTEC.

The fabric with **Nanutec technology**, **an intelligent fabric** that stands out for its great adaptability to external temperature, so when it is cold it closes so that the temperature does not pass through and thus, it retains heat. In addition to thermal insulation, it has great breathability and comfort.

SHIRT

Dual-Use Thermal

Unisex

Mod. Siku
Code 6005C
Navy

Bi-Elastic

breathable

Characteristics:

Thanks to the **technology in design** and manufacturing and the use of a **very fine yarn**, we achieve a **micro-perforated fabric**, **comfortable** and with a perfect fit to the body, without the use of elastane or any other elastic fiber.

The **multifilament yarn** provides **body thermoregulation intelligent**, adapting the internal temperature to the external one, also achieving rapid moisture wicking and a **high reduction of body odor.**

We simplify the seams to **avoid skin problems.**

The microperforation achieves **maximum lightness** of the garment, around **70 grams**, depending on the size.

Composition:
65% Polyester
35% Microfiber Polyamide
112 g/m²

Sizes:
From 2XS/XS to 2XL/3XL
